

Comments of The UPS Store #3410

Docket Number MC2012-26

July 19, 2012

Secretary of the Commission,

As a UPS Store Owner, our mailbox customers are dedicated and loyal customers. We have always increased our box numbers due to the fact that their mail comes to a physical address. We also get more business because of the customer being able to receive private carrier packages at our store. The one thing that the Post office hasn't allowed us to do is do a change of address form from the store to another address. If I am correctly reading this new rollout, we will now be able to allow our mailbox customers to forward their mail with the post office which I believe will be a great benefit to them.
